

HRS Process Systems Ltd – the heat exchanger specialists!

Our quest for bringing in 'World Class Technologies' to the Indian sub continent led to establishing 'HRS Process Systems Limited' in Pune, a wholly owned subsidiary of HRS International, UK. HRS PSL was incorporated in 2003 and has its manufacturing facility near Pune. The company is ISO 9001:2008 certified and ASME 'U' stamp accredited. HRS Group operates at the forefront of thermal processing technology and is one of Europe's leading heat exchanger specialists with a multi-million Euro turnover, offering effective heat transfer solutions for an extensive range of processing applications, across a diverse spectrum of industries like chemical, petrochemical, food & beverage, paper & pulp, pharmaceutical, fertilizer, edible oil & fats, bio diesel, oil & gas, steel, power, effluent treatment, automotive and various other process industries. The HRS Group also operates an extensive international distributor network, which covers the majority of Europe as well as Australia, New Zealand, Malaysia, Japan, South Africa and Israel. For HRS PSL, the India-Asia subsidiary, export markets are Europe, North and South America, South-East Asia, Australia and Pacific rim countries.

HRS Group also has a research center in Murcia in Spain where research is carried out into existing and future processing techniques for the food industry using the corrugated tube heat exchangers. The findings from the research center enable the Group to offer increased competitiveness in terms of new product development and processing techniques. The company has embarked on a business plan that envisages healthy growth of 30 to 35% per annum from the time of inception with major investments in the year 2006-07 for setting up a most modern fabrication facility. This is put into action on a four acre plot, off Pune-Nagar highway about 20 km from the city. The factory has a covered area of over 40,000 sq.ft., with ample scope for expansion. "This facility will be housing our R & D centre for the HRS Group's activities to be addressed in the Indian and other markets. Presently operating with strong engineering design and manufacturing support of our ably qualified employees, we plan to add more to the expertise in the coming years to cater to our expansion plans.", says Mr. V. Gokuldas, Managing Director, HRS Process Systems.

Our product range includes:

- ECOFLUX* Corrugated Shell and Tube Heat Exchangers
- ECOFLUX* Smooth Tube Heat Exchangers

- HRS Funke Plate Heat Exchangers
- HRS Hot Water Systems
- UNICUS® Scraped Surface Heat Exchanger
- Aseptic Steriliser and Filler
- Food / Fruit Processing Systems
- Evaporation Systems
